Bone conduction hearing systems

Hearing is a significant part of the child's learning process. For children with combined and/or sound conduction loss and one-sided deafness, bone conduction is the natural alternative for hearing assistance.

The sound is transmitted in the form of mechanical vibrations via the cranial bone directly into the inner ear.

junior: hearing system for children

Specially developed for children

junior is a fully digital bone conduction hearing system specially developed for children. It is particularly light and powerful. It consists solely of a small, discreet housing with miniature earphones.

junior bone conduction hearing system

Specially developed for children

With junior you get a hearing system that allows your child to access the world of hearing in a simple way – without surgery!

junior children's hearing systems are small, light and comfortably fixed and worn in a headband.

Children's hearing system

Hear, see, feel and play unencumbered.

EN

*„Wearing a headband or cap
is really cool. Now I can even
hear really well with it.“*

So light, so good

Carefree hearing, carefree playing

The combination of headband and hearing module offers many advantages to your child. Advantages that distinguish **junior** from comparable bone conduction hearing systems made by other manufacturers. Thus, the hearing system used in combination with the headband is

- hardly noticeable for your child,
- extremely comfortable to wear,
- always automatically positioned correctly on the head,
- almost invisible to others.

No children’s hearing system is more comfortable and discreet.

The **junior** hearing system is „made in Germany“. A quality product that will accord your child long-lasting pleasure.

Small but wow!

Almost invisible - strong in performance

- Easy to use
- Extra child safe
- State-of-the-art digital technology
- Wireless connection options with FM systems

Fashionable headbands

You have the choice

A great selection of beautiful and fashionable headbands for your child is directly available from your acoustician. These are already prefabricated for easy assembly of the **junior** hearing system.

Your hearing care professional will be pleased to show you the selection of our headbands.

Even personal headbands can be modified for deployment of the **junior** hearing system so that your child won’t have to do without his/her favourite headband.

Your hearing care professional can help ...

Headband adjustment

Your child would like to use his/her own headband? Your acoustician can check whether it is suitable for carrying the **junior** hearing system.
