“Wearing a headband or cap is really cool. Now I can even hear really well with it.”
The combination of headband and hearing module offers many advantages to a child. Advantages that distinguish junior from comparable bone conduction hearing systems made by other manufacturers. Thus, the hearing system used in combination with the headband is

- hardly noticeable for the child,
- extremely comfortable to wear,
- always automatically positioned correctly on the head,
- almost invisible to others.

No children’s hearing system is more comfortable and discreet. The junior hearing system is “made in Germany”. A quality product that will give the child long-lasting pleasure.

junior BC
Carefree hearing, carefree playing

Fashionable headbands
Customers have the choice

The customers receive a great selection of beautiful and fashionable headbands for the child. These are already prefabricated for easy assembly of the junior hearing system.

Even personal headbands can be modified for deployment of the junior hearing system so that the child won’t have to do without his/her favourite headband.

Small but wow!

- Barely visible from the outside
- Adjustable headband
- Easy to use
- Good sound quality
- Automatic adjustment of the listening intelligibility
- Perfect hearing in noisy surroundings
- Noise reduction
- Wind noise reduction
- Two levels of feedback canceling
- Phonak Roger system usable
- Volume control and program selection can be deactivated
- Fitting with bone conduction fitting software
- Compatible with NOAH and NOAH Link from Vers. 4.3

Diverse. In addition to the standard color black, the junior BC is available in many great colors and patterns.
The new junior BC WR headband hearing system for children cuts a fine figure even in wet conditions thanks to its water resistance and easy handling. Thus, the hearing system used in combination with the headband is

- hardly noticeable for the child,
- extremely comfortable to wear,
- always automatically positioned correctly on the head,
- almost invisible to others,
- resistant to rain and splashes.

A hearing system that is discreet and comfortable to wear, making it perfect for children. The junior hearing system is “made in Germany”. A quality product that will give the child long-lasting pleasure.

Customers can choose from a wide range of trendy and colourful headbands for children. These have already been adapted to make it easy to connect the junior BC WR hearing system.

The customer’s own headbands can, of course, also be adapted for use with the junior BC WR hearing system so that the child can keep his/her favourite headband.

**Innovation at its finest**

- Water resistant
- Barely visible from the outside
- Adjustable headband
- Easy to use
- Good sound quality
- Automatic adjustment of the listening intelligibility
- Perfect hearing in noisy surroundings
- Noise reduction
- Wind noise reduction
- Two levels of feedback canceling
- Phonak Roger system usable
- Volume control and program selection can be deactivated
- Fitting with bone conduction fitting software
- Compatible with NOAH and NOAH Link from Vers. 4.3

Diverse. In addition to the standard color black, the junior BC WR is available in many great colors and patterns.
New!

For small rain dancers and puddle jumpers:

“I have so much fun with my new headband and can hear perfectly when I use it, even in wet weather.”
“Now, I can not only read, but even hear with my glasses. A great solution.”
We understand hearing.

la belle: seeing and hearing in one

Simply ingenious: the glasses become the hearing system

The patented hearing module is technically and optically integrated into the glasses so that the added value of the glasses is virtually invisible. Due to the familiar position of the glasses on the head, the new hearing system is

- automatically ideally positioned on the head,
- not noticeable to the wearer,
- hardly visible to others.

No other hearing system can be worn more comfortably or discreetly. The la belle hearing system is “made in Germany”. A quality product that will guarantee the wearer long-lasting pleasure.

Technology at its finest

- Easy to use
- Realistic sound
- Automatic adjustment of the listening intelligibility
- Perfect hearing in noisy surroundings
- Noise reduction
- Wind noise reduction
- Two levels of feedback canceling
- Fitting with bone conduction fitting software
- compatible with NOAH and NOAH Link from Vers. 4.3

Mechanics at its finest

- End pieces cold bendable
- This makes the position of the receiver flexible
- Chamber lid in gold, silver or anthracite possible
- Battery compartment cover size 312 or 13
- Change to different glasses possible
- Almost all glasses can be used for the click system
The patented hearing module is mounted on an adjustable metal bracket and resembles a headset or headphones. Due to the predefined position of the hearing modules, the new hearing system is

- ideally positioned on the head in a jiffy,
- light and thus hardly noticeable.

The headset hearing system is “made in Germany”. A quality product that will guarantee the wearer long-lasting pleasure.

The light and subtle metal bracket can be quickly and easily adjusted to different head sizes via the two adjusters.

In addition, the bend of medical spring steel can be changed. Thus, the hearing system can be placed in the perfect position.

We understand hearing.
“Brilliant – the headset hearing system is super light and fast and easy to position correctly on the head.”
BC-Fit
Software for all bruckhoff bone conduction systems

Practical. Clear display allows the right and left side of the hearing system to be easily and intuitively adjusted.
The BC-Fit fitting software provides a tool for trouble-free management of all your day-to-day tasks. BC-Fit is suitable for:

- Customer management
- Device selection, programming and adjustment
- Providing advice (data logging / recommending adjustments)
- An overview of information about the hearing system

The optimum position of the earpiece is determined with the help of a tone generator. A ‘first fit’ is also possible at the touch of a button.

Download our BC-Fit fitting software now from www.bruckhoff.com in the “Downloads” section.

**One-Click.** Configure and adapt your customers’ hearing systems at the touch of a button using pre-defined profiles.

**Everything at a glance.** The ‘Data history’ section provides an insight into the customer’s habits, e.g. how often the volume has been changed using the VC adjuster or how often programme 2 has been used etc. The display shows an extract of the data history.
